

Information Brochure  
for  
Certificate cum Training  
Course on

**“Improving the  
Quality and  
Outcome of  
Experimental  
Research”**

**December 04-09, 2023**

**National Institute of  
Pharmaceutical Education  
and Research (NIPER)  
Raebareli**

**([www.niperraebareli.edu.in](http://www.niperraebareli.edu.in))**

**National Institute of Pharmaceutical Education and Research (NIPER)  
Raebareli**

**Certificate cum training course**

**on**

**“Improving the Quality and Outcome of  
Experimental Research:  
through Laboratory to Investigators Approach”**

**December 04 - 09, 2023**

**Course Fee: Rs 8500/-**

*(Including fooding and accommodation at shared dormitory for course duration)*

**Last date of application: 20<sup>st</sup> November 2023** (First cum First Serve basis).

**Venue: NIPER-R Lucknow Campus**

**Total seats: 20**

**Online application link: <https://form.jotform.com/211135573176453>**

**Account details: <https://www.onlinesbi.sbi/sbicollect/icollecthome.htm?corpID=4357359>**

*(Fee should be paid online through SBI Collect which can also be accessed from the Institute website. Select “Online Payment” at homepage and then select “Conference Seminar Symposium and Short-Term Course” option as payment category. Upload the screenshot/proof receipt with online application system)*

**Focus**

**Hands on Training and workshop on improving the outcomes of**

- *Cellular Imaging and Confocal Techniques*
- *Live Cell Imaging*
- *In-vivo Imaging Techniques*

**Address for correspondence**

**Dr Ashok K. Datusalia**

Co-ordinator Certificate course

National Institute of Pharmaceutical Education and Research (NIPER) Raebareli  
Bijnor-Sisendi Road, Sarojini Nagar, Near CRPF Base Camp, Lucknow (UP)- 226002

## ***About the Course***

There are increasing demands of trained personnel working in the healthcare industries including biomedical research, drug discovery and disease diagnosis. Experimental research is an integral part of the health care eco-system and there is a huge demand for trained professionals with update knowledge in the era of new challenges and current rapidly changing regulatory requirements. Successful research/discovery largely depends on outcomes of early research *viz in-vitro* experiments, preclinical investigation using animals and right interpretation of recorded data *etc.* and required multidomain skilled human resources. The current academic curriculum is unable to fulfill the needs for multi-domain skilled human resources required for biomedical industries/research establishments due to its own limitation. To fulfill this demands, NIPER-R is conducting certificate Course for young health care professional and biomedical researcher to enhance their skills sets for quality data outcomes. Institute had conducted 1<sup>st</sup> batch of certificate program with 20 participants in November 2021 and second batch in 2022.

The course program includes lectures, resource materials, problem based practical laboratory approach for quality data, quality readouts. Certification will be done based on lecture/training wise assignments and a final proctored exam. Following modules will be included in programs along with practical training on quality immunostaining, microscopy (live cells, confocal imaging *etc.*) and in-vivo imaging.

- Evidence based biomedical research
- Quality of information and quality outcome
- In-vitro research
- Uses of laboratory animals in biomedical research
- Laboratory material management
- Analytical and Quantitative Light Microscopy
- Fluorescence Microscopy and Fluorophores
- Image Analysis
- In-vivo Imaging Techniques and application
- GLP requirements in Research
- Animal welfare rules and management
- Alternative to animals in experimentation
- Social Responsibility and Bioethics
- Laboratory behavior and ethics
- Experimental data collection and management
- Statistical tools and data interpretation
- Bid DATA analysis and management
- Data Reporting and Science communication

At the end of module, a written exam will be conducted and certificated will be issued to trained professionals.

## ***Eligibility and Selection***

1. Student of masters and PhD programs in life science and allied area.
2. Post-doc scholars, junior/senior research fellow at university/Institutions
3. Working professional at medical college/biomedical labs etc.
4. Industry/CRO professional involved in biomedical research.

## ***The Institute***

The Institute was established in 2008 under the aegis of the Ministry of Chemicals and Fertilizers, Govt. of India and has been declared as Centre of Excellence owing to its importance in imparting pharmaceutical education and research. Since July 2018, NIPER, Raebareli is independently functioning from new transit campus at Bijnor-Sisendi Road, Lucknow. and having academic and administrative blocks, hostel blocks separate for boys and girls and cafeteria. Institute ranked 13th position in the NIRF Ranking in the Pharmacy category. At present, Postgraduate (M.S. (Pharm) and Doctoral (Ph.D.) programs are offered by the Departments Biotechnology, Pharmacology and Toxicology, Pharmaceutics, Medicinal Chemistry, Regulatory Toxicology program in Climate Studies is offered by the corresponding group.

NIPER, Raebareli is actively engaged in addressing therapeutic needs of the country, especially focusing on locally prevalent diseases. Tuberculosis being one of the most lethal diseases of the country which warrants urgent attention as most of the available drugs are undergoing resistance issues. As per mandate, NIPER-R has started research programs directed towards design and development new anti-tubercular agents for treatment of TB. The intense research programs are also aimed towards treatment of neurodegenerative diseases like Alzheimer's disease. The Department of Pharmaceutics is actively involved in the development of nanoformulations for BCS class II and IV drugs and peptides. The primary focus for developing nanoformulations is to target brain, through nanoemulsions, drug nanofibres, polymeric drug nanoparticles, pharmaceutical nanocrystals/ cocrystals, mesoporous silica nanoparticles etc. The primary research focus of Department of Pharmacology and Toxicology's is on the understanding mechanisms central to neurodegenerative disorders such as Alzheimer's disease. The research programs are also directed in studying pathomechanisms driving neurological consequences of arsenic, copper, and pesticide exposure.
